## 1. Qualitative Information on Quarterly Consolidated Financial Performance

### (1) Explanation of Results of Operations

During the first half of the fiscal year ending March 31, 2024, there was a broad-based slow economic recovery in Japan as the economic activities began returning to normal due to the progress of the “With Corona” policy, such as reclassifying COVID-19’s category from Class 2 to Class 5, categorized as a common infectious disease. Despite this improvement, some weakness was seen in housing and non-housing starts partly due to soaring construction material prices.

Looking at the world economy, in the United States, consumer spending remained strong while inflation was protracted. In China, the economy is stagnating, due to worsening employment conditions and the sluggish real estate market. In addition, uncertainty is increasing due to the prolonged Ukraine crisis.

In Japan, while automobile production increased as semiconductor supply shortages have been resolved and by other factors, construction starts, including housing, and machinery production declined. Under the circumstances, order and production show declining trends in the steel industry.

In overseas steel markets, the business climate is weakening, mainly in Asian markets, due to the impact of the steel supply-demand gap in China and other factors.

In such an environment, the Yodogawa Steel Group’s net sales for the first half decreased 17,239 million yen from the same period of the previous fiscal year to 101,286 million yen. Operating profit decreased 2,763 million yen to 5,472 million yen, ordinary profit decreased 3,287 million yen to 7,672 million yen, and profit attributable to owners of parent decreased 672 million yen to 5,185 million yen.

In Japan, sales and earnings decreased year on year mainly due to lower sales of steel sheets resulting from a decline in sales volume.

Overseas, sales and earnings decreased year on year mainly due to lower sales at Taiwan subsidiary Sheng Yu Steel Co., Ltd. (SYSCO).

Business segment performance was as follows.

#### 1) Steel Sheet-related Business

Sales and earnings decreased year on year with net sales of 96,170 million yen and operating profit of 5,382 million yen.

##### Steel Sheets

In Japan, both sales and earnings decreased year on year because of sales volume declines for both specific high-demand customers and general distribution as a result of stagnant demand in the building construction sector, despite the rise of selling prices of all types of steel sheets.

Overseas, both sales and earnings of SYSCO in Taiwan decreased year on year mainly because of declines in sales volumes and selling prices in both export and domestic market. At Yodogawa Shengyu (Hefei) High-Tech Steel Co., Ltd. (YSS), a subsidiary in China, the sales volume increased thanks to economic normalization following the lifting of China’s zero-COVID policy. Despite this improvement, the momentum of recovery was slow and improvement in business results was modest mainly because of the sluggish real estate market. Sales and earnings of PCM Processing (Thailand) Ltd. (PPT), a Thai subsidiary, increased chiefly because of improvement in selling prices.

##### Building Materials

Sales of exterior products decreased mainly due to lower sales volume of storage sheds and sales of exterior construction material products decreased mainly due to lower sales volume of YODO Roof.

#### 2) Roll Business

Net sales totaled 1,714 million yen and operating profit was 78 million yen.

Sales increased year on year and earnings improved mainly due to improved selling prices for exports.

### 3) Grating Business

Net sales totaled 1,719 million yen and operating profit was 89 million yen.

Both sales and earnings rose primarily owing to improved selling prices.

### 4) Real Estate Business

Net sales totaled 625 million yen and operating profit was 392 million yen.

Both sales and earnings were almost on par with the same period of the previous year.

### 5) Other Businesses

Net sales totaled 1,055 million yen and operating profit was 186 million yen.

Despite the increase in sales, earnings remained almost unchanged from the same period of the previous year.

## **(2) Explanation of Financial Position**

### Assets

Current assets increased by 3,667 million yen from the end of the previous fiscal year to 154,534 million yen. This was attributable mainly to increase of 7,724 million yen in cash and deposits, which was partially offset by decreases of 1,990 million yen in securities, 531 million yen in work in process, and 782 million yen in raw materials and supplies.

Non-current assets increased by 4,897 million yen from the end of the previous fiscal year to 105,086 million yen. This was attributable mainly to an increase of 4,440 million yen in investment securities.

Total assets increased by 8,564 million yen from the end of the previous fiscal year to 259,621 million yen.

### Liabilities

Current liabilities decreased by 2,440 million yen from the end of the previous fiscal year to 32,651 million yen. This was attributable mainly to a decrease of 2,093 million yen in notes and accounts payable-trade.

Non-current liabilities increased by 1,261 million yen from the end of the previous fiscal year to 15,320 million yen. This was attributable mainly to an increase of 1,148 million yen in deferred tax liabilities included in other non-current liabilities.

Total liabilities decreased by 1,178 million yen from the end of the previous fiscal year to 47,971 million yen.

### Net assets

Net assets increased by 9,743 million yen from the end of the previous fiscal year to 211,649 million yen. This was attributable mainly to increases of 3,159 million yen in retained earnings, 3,087 million yen in valuation difference on available-for-sale securities, 2,070 million yen in foreign currency translation adjustment, and 1,401 million yen in non-controlling interests.

## **(3) Explanation of Consolidated Forecast and Other Forward-looking Statements**

The Japanese economy is expected to recover moderately during the fiscal year 2023 mainly because of the return of foot traffic following the downgrading of COVID-19 and easing of supply restrictions. However, the outlook for the global economy is expected to remain extremely opaque because of the Chinese economy continuing to stall due to the sluggish real estate market, concerns about recession due to monetary tightening in the US and Europe, the prolonged situation in Ukraine, and new conflicts and turmoil over the Palestinian territories in the Middle East.

In the steel markets in Japan and overseas, while increases in raw material prices used for steelmaking as well as the cost of resources and energy are coming to a pause, there is an impact of the Chinese steel market on the back of the country's stagnant economy, combined with concerns about rising geopolitical risks. Due to this situation, the steel market, including the supply-demand balance, is likely to remain unstable for the time being.

The Yodogawa Steel Group as well is likely to continue to operate in a challenging business climate due to the unpredictability and instability of demand and costs in all regions.

To succeed in this uncertain business climate, all group companies are focusing on speed and agility concerning both sales and production activities to respond to rapidly changing market conditions. At the same time, by steadily implementing the “Yodogawa Steel Group Medium-Term Management Plan 2025,” we will work to strengthen our earning power.

The forecast for consolidated performance of the current fiscal year is based on this outlook for the economy and steel market.

##### Contingent liabilities

Yodogawa Steel Works has determined that, depending on the location, conditions, and other aspects of their use, there have been problems involving the appearance and durability of some building exterior pre-painted steel sheets manufactured between 2007 and 2016 that have occurred prior to the end of the expected lifetime of these sheets. Yodogawa Steel Works has explained this problem to companies that sell these sheets and is covering repair and other expenses.

Repair and other expenses, including expenses for problems that have occurred but where repairs and other activities have not been completed, are recorded as period costs. The costs of the future problems involving these sheets have not been expensed because it is not possible to determine a reliable forecast of how many problems will occur.

There may be significant repair and other expenses involving these sheets in the coming years depending on number of problems that occur.
